The Spell*

The Basic

Those Names: Rules, Workflow, Skill,
Subagent... etc.

Back to the Basic

Text
Transformer
Text

How to talk with a model?

Prompting

is still the basic.

Fundamental

Context

Static VS Dynamic

By Lee Robinson from Cursor/Vercel

Static Context

Rules

Command/Workflow

Dynamic Context

Info Gathered by AI

Function Calling

Can be triggered by LLM itself

/Skills

It still a prompt anyway

**Only different is can be trigger by
an Agent**

The News

How we prompt in 2026?

The harness

Evaluating AGENTS.md: Are Repository-Level Context Files Helpful for Coding Agents?

Expert Personas Improve LLM Alignment but Damage Accuracy: Bootstrapping Intent-Based Persona Routing with PRISM

by University of Southern California

Use character for expression

Otherwise, it reduce accuracy

Harness Engineering

Martin Fowler love it!

Harness Engineering

Context Engineering

Architectural Constraints

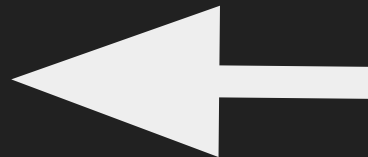

Garbage Collection

a lot of loops

Outside the loop

In the loop

On the loop

We want here

So, What's Plan mode planning?

Setup a harness for an agent.

The Spell

Learning how to talk. Again.
